Adding a New Domain to the Microsoft 365 Admin Center

T-Mobile has assigned your company a domain in the following format. You can find your individual number in the Order section of your contract:

This domain will be used for voice communication in MS Teams. You need to add this domain to the **Admin Center** panel of your organization on the **Microsoft 365 portal**.

1. Once you have logged in, go to: **Settings** > **Domains** > **Add domain**. Enter the domain assigned to your company by T-Mobile and click **Use this domain**.

2. Verify the domain, by selecting: **Add a TXT record to the domain's DNS records**.

image.png
Image not found or type unknown

Click **Continue** to generate a **TXT record** to verify domain ownership.

3. The DNS record information will be displayed.

Image not found or type unknown

Make sure to leave the **Microsoft Admin Panel** open in your browser and email the following address: **uc@t-mobile.pl**. For the subject line, use "Autoryzacja domeny". In the body of the email, type the value of the **TXT record**, for example, "**MS=ms74966152**".

Once you receive a confirmation message from T-Mobile that the record has been created on the DNS servers, you can move on to the next step.

4. Now, return to the **Microsoft Admin Panel** page and verify the domain by clicking the **Verify** button.
