Creating a user for integration with the telephony network

To integrate a tenant with the T-Mobile network, you need to create a user and assign them a license with the Teams Phone add-on. After the integration work is complete, this user can be deleted. This will allow you to recover the license.

1. From the menu on the left, select **Users** > **Active Users**.

4. Assign the user a license that includes **Microsoft Teams.** For example:

- Microsoft 365 E5,
- M365 Business Basic,
- M365 Business Standard.
